

MEETING REPORT

Team Name: Meetly **Date of Meeting:** 27/03/2018

Start Time: 11:00 AM **End Time:** 12:30 **Meeting Location:** Epoka Campus

Moderator: Deni Daja **Recorder:** Klesti Kuka

Other Members Present: Bojken Sina, Ernit Hoxha

Members Absent: -

Topics Discussed:

In this meeting we discussed in detail the features/modules that the software would have and also we did a short introduction of the database structure. The overall features of the web application would be:

Module 1: Dashboard

Module 2: Map Based Job Distribution

Module 3: Human Resources.

The job distribution for the initial design and functionalities of the system are as follows:

Dashboard & Map Based Job Distribution – Deni Daja, Klesti Kuka
Human Resources – Bojken Sina, Ernit Hoxha

The framework we will use for the system is Symfony. We decided on Symfony for the following reasons:

1. Permanence of the framework and its long term support.
2. The framework promotes and enforces best practices, standardization and interoperability of applications.
3. The framework enforces a MVC model.
4. The framework makes testing and debugging very easy and comprehensive.
5. The framework supports very well mid to large scale web applications, which is the type of project that we aim to build.

We also decided to separate the work of the next week report.

Klesti and Deni will work on the first chapter and functional requirements, while Bojken and Ernit will work on non-functional requirements.

Time, Place, and Agenda for Next Meeting:

Time : 10:00 AM

Place: Epoka Campus

Date: 3/04/2018
